SKILLS

- ❖ **Languages:** JavaScript, TypeScript, HTML, CSS
- ❖ **Frameworks/Libraries:** React, Next.js, Tailwind CSS
- ❖ **Databases:** Firebase, PostgreSQL
- ❖ **State Management:** Zustand, Redux
- ❖ **Data & UI Utilities:** TanStack Query, TanStack Table
- ❖ **Tools:** Git, GitHub, Docker
- ❖ **Concepts:** Responsive Design, NPM, Web Accessibility, Firebase
- ❖ **Soft Skills:** Collaboration, Problem-Solving, Attention to Detail, Adaptability

EDUCATION

- ❖ **International University of Applied Sciences** (Ongoing 2025 – present)
BSc. Software Development
- ❖ **Kwame Nkrumah University of Science and Technology** (Completed – 2024)
BSc. Quantity Surv. and Construction Econs.

EXPERIENCE

- ❖ **Frontend Developer (Full-stack responsibilities) | Uniquet Africa ([Live](#))**
(October 2024 - Present)
 - Designed and developed a platform to help high school graduates choose university programs, scholarships and career paths.
 - Added **program comparison** and **filtering** features to improve user decision-making.
 - Built a recommendation engine with **Next.js** and **Firebase**, and developed a **custom CMS** for admin program management.
 - Built responsive UI with **TanStack Query**, **Zustand**, and **TailwindCSS**.
 - Integrated role-based access and draft/publish system.
- ❖ **Frontend Developer (Full-stack responsibilities) | MyAgriPort (Founder Project | [Live](#))**
(June 2024 - Present)
 - Building a logistics and storage coordination SaaS for the agriculture sector in Ghana.
 - Designed frontend architecture with **Next.js**, **React**, and **Tailwind CSS**, focusing on scalability.
 - Implemented core features like **storage management**, and **user analytics dashboard**.
 - Planned data models, analytics events, and system architecture to support future scaling.
 - Integrated Firebase services for **real-time data handling** and **secure access**.

❖ Frontend Developer | MalDec Labs ([GitHub](#))

(October 2024 – April 2025)

- Designed and developed a fully responsive web application, **ensuring accessibility** across all devices.
- Implemented dynamic UI components with **React**, **TanStack**, and **Zustand** for an interactive user experience.
- Integrated backend services for **authentication**, **payments**, and **real-time data** updates.
- Optimized performance, **improving SEO** and load times.

PROJECTS

❖ Coffee E-commerce Website *(Collaboration – TypeScript)*

[GitHub](#) | [Live Demo](#)

- Built a responsive e-commerce frontend with TypeScript and React.
- Implemented reusable UI components for product display and cart functionality.
- Collaborated with teammates to integrate frontend with backend services.

❖ Anime Discovery Website *(Solo – TanStack, Jikan API)*

[GitHub](#) | [Live Demo](#)

- Integrated the **Jikan API** to fetch and display anime data.
- Used **TanStack Query** for efficient data fetching, caching, and state management.
- Designed a clean, responsive UI for smooth anime browsing.

❖ Job Application Tracker *(Solo – TypeScript)*

[GitHub](#) | [Live Demo](#)

- Built a web app to track job applications across different stages.
- Implemented TypeScript for type safety and scalable code.
- Added state management to sync updates across multiple lists.

❖ Rock-Paper-Scissors Game *(Solo – Vanilla JavaScript, The Odin Project)*

[GitHub](#) | [Live Demo](#)

- Developed an interactive game using only **HTML**, **CSS**, and **JavaScript**.
- Practiced DOM manipulation, event handling, and game logic implementation.
- Enhanced UI with responsive styling for better user experience.

CERTIFICATIONS / TRAINING

❖ Web Development Bootcamp (HTML, CSS & JavaScript)

GMSA-KNUST

(2021)

❖ Web Development Online Course (JavaScript, React & Node.js)

The Odin Project

(2022)

ACHIEVEMENTS / HOBBIES

- ❖ Recipient of a merit-based scholarship at IU International University of Applied Sciences for B.Sc. Software Development
